

Innovative technology for the steel industry

2017

Invitation

8 worldwide technology leaders will present and discuss their state-of-the-art technology and their last developments

The tools for maximizing your profits and market share by increasing quality and value of your products and optimizing operating costs and flexibility

Thursday April 20, 2017

08:00 – 20:00

JW Marriott

Know-how for tomorrow

Seminar organized by

and

AEP Asia AEP Asia Limited.

Duong Hieu Trading & Mining

Innovative technology for the steel industry 2017

Presenting Companies

Schredder, separator, hammer mill, baler shear, rail breaker and shears.
Electro lifting magnets – Electro permanent lifting magnets

Electric arc furnace pusher carriage - Lances and manipulators - Ladle inert gas coupling device

Hot rolling mills for long products

Stretch Reducing Mill for tubes
Reducing and Sizing Block for rod and bar mill

Abrasive cut-off machine for cold, warm or hot cutting. High-pressure grinding machine for bright, spot and edge grinding.

Bar & Tube Finishing: combined drawing system, peeling, straightening, cutting, sawing, chamfering, milling, shot blasting.

Roll grinding machines and CNC machine tools

Metallurgy - Extractive metallurgy - Foundries - Surface treatment - Automobile / Aeronautic
Steelmaking - Electronics

Innovative technology for the steel industry 2017

Program

08:00 - 08:45 **Registration**

08:45 - 09:00 **Welcome VNSteel, AEP Asia and Duong Hieu Trading & Mining**

09:00 - 09:30 **Session 1 – SGM Magnetism S.p.A.**

- Improvements in EAF Operation by means of innovative SGM Magnetism Scrap Refining System

09:30 - 10:00 **Session 2 – C.M.P. Officine Meccaniche S.r.l.**

- Automatic slag pusher at EAF and automatic inert gas coupling at LRF

10:00- 10:30 **Coffee break**

10:30 – 11:00 **Session 3 – NCO : Nuova Carpenteria Odolese Spa**

- High productivity of small size bars through single slit rolling mode

11:00 - 11:30 **Session 4 – Friedrich KOCKS GmbH**

- The new RSB Generation – Innovative Design and Process Features of the RSB SCS®.

11:30 - 12:00 **Questions and answers**

12:00 - 13:30 **Buffet lunch**

13:30 - 14:00 **Session 5 – HERKULES GmbH**

- Reliable and efficient roll machining to support your rolling mill

14:00 - 14:30 **Session 6 – BRAUN Maschinenfabrik GmbH**

- State-of-the-art cutting and grinding solutions for applications in the steel industry

14:30 - 15:00 **Session 7 – EJP MASCHINEN GmbH**

- Modern Bar and Tube Finishing Lines for high quality steel production

15:,00 - 15:30 **Coffee break**

15:30 - 16:00 **Session 8 – CMI**

- Wire pickling lines: Zero discharge, fully automatic & high efficient vibration technology

16:00 – 16:30 **Questions and answers**

18:00 - 20:00 **Dinner**
