

## C.M.P. SCRAP BUCKET CAR

**C.M.P. SCRAP BUCKET CAR** is designed to charge scrap bucket avoiding typical damage suffered by traditional cars because of the scrap fall. Thanks to correctly designed outer shape, which is always “in the shadow” of the bucket, the scrap could be easily charged without worrying about its fall on the car and related damage and consequent loss of time and money.

The use of **C.M.P. SCRAP BUCKET CAR** allows the following **advantages**:

- **REDUCTION OF PRODUCTION LEAD-TIME**: thanks to reduction in wasting of time due to repairs and maintenance intervention on scrap bucket car;
- **SELF PROPELLED CAR OR CABLE REEL**: generating electric power unit or cable reel driven motion;
- **EQUIPPED WITH ALL MAIN UTILITIES**: radio controlled – weighing system;
